ABOUT

I studied HTML, CSS, JavaScript, jQuery, React, node.js, and C# at Epicodus. I am currently working as a full-stack developer intern in I-ology. I enjoy problem-solving and meeting people from different backgrounds. I have always prided myself on my time management and keeping myself motivated, as well as remaining flexible in the face of any challenge. Without hesitation, I am looking forward to facing new challenges, learning more new skills, and building strong and lasting work relations along the way.

EXPERIENCE

I-ology, Remote — *Full-Stack developer intern*

2022 - present

- Being part of the I-ology team, added ability for patients to create accounts, log in, update their patient information, book appointments, and pay bills
- Added authentication and authorization through Umbraco Cloud CMS
- Made other interactivity through APIs for the in-office medical record system and appointment/billing system used by the lab
- Used Vue.js, Sass, and Umbraco Cloud CMS for the frontend.
- Used ASP.NET/C# for the backend
- Deployment through Umbraco Cloud CMS

Spring Market, Portland, OR — *Receptionist*

2015 - 2022

- Used effective communication to place customer orders, down to every detail or customer specification. Through my efforts at the company, the customer base has increased by 10% each year
- Coordinated with co-workers each step of the way to ensure the success of each delivery

EDUCATION

Epicodus — *Computer Software Engineering*

2021 - 2022

- Completed 10-month intensive learning
- Built 60+ projects using Javascript, React, Node.js, C#, HTML, CSS
- Worked in team-based situations and formed strong group dynamics
- Introduced to new skills and methods every day, and learned how to adapt quickly and take instruction on the fly, then apply it on my own

Portland State University, Portland, OR —*Communication/General*

2011 - 2015

SKILLS

JavaScript, React, C#, Node.js, .NET, HTML, CSS, Object-Oriented Programming, Test-driven development, Web Development, jQuery, Git, RESTful API, MySQL, Redux, AWS, NoSQL, Firebase, Umbraco Cloud, Vue, Sass, Jira, Kanban
