

Sisi Vieira

(503)419-8085 | cicy886@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Detail-oriented QA Engineer with hands-on experience in manual testing, API validation, and UI test automation. Known for identifying high-impact bugs early in development and driving collaborative resolutions that improve release quality and velocity. Proficient in Cypress, Postman, and TestRail, with a full-stack development background in C#, .NET Core, JavaScript, and React. Skilled in Agile workflows, CI/CD pipelines, cross-system testing, and collaboration with developers and product managers.

Technical Skills

- **Testing & QA:** Automated Testing (Cypress), Manual Testing, API Testing (Postman, Swagger), Test Case Management (TestRail), Bug Tracking (Jira, Monday.com, Azure DevOps), Accessibility Testing (WCAG), RBAC Testing, Cross-browser Testing, Mobile Testing (iOS/Android), Integration Testing, Functional Testing, User Acceptance Testing, Test-Driven Development (TDD), Monitoring (DataDog, Google Logs), Feature Flag Testing (custom toggles)
- **Programming & Frameworks:** C#, .NET Core, JavaScript (ES6+), TypeScript, Node.js, React, Redux, Vue.js, HTML5, CSS3/SASS, jQuery
- **Databases & Tools:** MySQL, Firebase (NoSQL), RESTful API Development, SQL & Database Validation, Umbraco CMS, Git/GitHub, Agile (Scrum/Kanban)
- **Collaboration & Workflow:** Slack, Jira, Monday.com, Azure DevOps, CI/CD (GitHub Actions)

Professional Experience

Powur, PBC

Mar 2024 - May 2025

Quality Assurance Engineer

Remote

- Led and executed UI automation (Cypress) testing, API (Postman, Swagger), and manual testing across complex SaaS platforms, including internal systems (Proposal Platform, Vision, PowurOS Pricing Engine) and third-party integrations (NREL, Genability, Sungage, Enfin)
- Implemented Cypress test scripts to automate key smoke flows and recurring regression scenarios
- Built Postman collections to validate API workflows for pricing, incentive logic, dealer fees, and loan eligibility
- Authored detailed test plans and traceable documentation in TestRail to support regression, smoke, and integration testing, ensuring audit compliance
- Conducted cross-browser and cross-device testing (Chrome, Safari, iOS, Android), validating responsive layouts and mobile workflows
- Queried relational databases to verify solar proposal calculations, user role mappings, and incentive eligibility logic
- Used Google Logs to investigate backend errors and troubleshoot production API issues
- Participated in CI/CD pipelines using GitHub Actions, collaborating on pull request reviews and deployment readiness testing
- Reviewed PRDs and clarified requirements to align test coverage with business objectives
- Logged and tracked 50+ critical bugs pre-release, contributing to a smoother release cycle and reducing support volume by 30%
- Participated in Agile ceremonies (daily stand-ups, sprint planning, retrospectives), helping improve team communication, test planning, and product quality

EyeCue Lab

Jun 2022 - Feb 2024

Quality Assurance Engineer

Remote

- Automated over 80% of UI regression cases using Cypress, reducing release verification time from 5 hours to under 2 hours
- Built and maintained Postman test collections to support API workflows, using environment-based chaining and data-driven assertion
- Conducted WCAG 2.1 Level AA accessibility audits, helping design teams implement inclusive front-end components
- Wrote SQL queries to validate backend data consistency, ensuring accurate data flow across APIs and UI components
- Monitored application performance via DataDog, proactively detecting and reporting outages and backend latency spikes
- Validated feature flag behaviors across multiple environments to support staged rollouts and environment-specific testing scenarios
- Reviewed over 100 pull requests across services and contributed feedback to resolve logic bugs and UI inconsistencies
- Documented reproducible bugs in Jira with clear steps and logs, reducing triage time by 30%
- Facilitated QA retrospectives, implementing feedback loops that improved test prioritization and sprint velocity

I-ology

Mar 2022 - May 2022

Full-Stack Development Intern

Remote

- Developed full-stack features for web applications in the healthcare industry, including patient scheduling, insurance, and user profile workflows, which improved user experience and streamlined operations
- Integrated APIs for third-party data sync and structured backend endpoints to support secure communication, enhancing data reliability and system security
- Designed mobile-responsive UI components and performed device-level validation to ensure accessibility and usability, leading to a more inclusive user interface

Personal & Training Projects

The following projects were developed during full-stack engineering training to demonstrate backend and frontend capabilities.

Tarot Card Reader | Node.js, React | <https://cicy886.github.io/tarot-card-reader>

- Developed a responsive SPA simulating tarot readings with dynamic card rendering and interpretation logic

Local Business API | C#, .NET Core, MySQL | <https://github.com/cicy886/LocalBusinessApi.Solution>

- Delivered a scalable RESTful API supporting location-based business discovery by category and service cost
- Structured endpoints with layered validation, robust filtering, and fallback mechanisms

Education

Epicodus – Remote

2021 - 2022

Full-Stack Software Engineering Program

- **Achievements:** Completed a 10-month intensive program in full-stack development, with hands-on training in C#, .NET Core, JavaScript, React, HTML/CSS, and Agile workflows, Built and deployed 60+ individual and team projects, applying principles of front-end and back-end engineering, version control (Git), and RESTful API integration, Developed CRUD web applications using C# with .NET Core MVC, and built dynamic UI components with React and JavaScript, Collaborated in Agile teams using pair programming, daily stand-ups, and code reviews to meet evolving project requirements and deadlines, Gained experience working under tight timelines, adapting quickly to new instructions and multi-step requirements in fast-paced sprints
- **Coursework:** C#, .NET Core, JavaScript, React, HTML/CSS, Agile workflows

Portland State University – Portland, OR

2011 - 2015

Communication/General
