Portfolio: <https://cicy886.github.io/my-portfolio-website/>

Professional Summary

Detail-oriented QA Engineer with hands-on experience in manual testing, API validation, and UI test automation. Known for identifying high-impact bugs early in development and driving collaborative resolutions that improve release quality and velocity. Proficient in Cypress, Postman, and TestRail, with a full-stack development background in C#, .NET Core, JavaScript, and React. Skilled in agile methodologies, user-centric testing, and cross-functional team collaboration.

Technical Skills

- Testing & QA: Manual Testing, API Testing (Postman, Swagger), UI Automation (Cypress), Test Case Management (TestRail), Bug Tracking (JIRA), Accessibility Testing (WCAG), RBAC Testing, Cross-browser Testing, Mobile Testing (iOS/Android), Test-Driven Development (TDD), Monitoring (DataDog)
- Programming & Frameworks: C#, .NET Core, JavaScript (ES6+), Node.js, React, Redux, Vue.js, HTML5, CSS3/SASS, jQuery
- Databases & Tools: MySQL, Firebase (NoSQL), RESTful API Development, Umbraco CMS, Git/GitHub, Agile (Scrum/Kanban)
- Collaboration & Workflow: Slack, TestRail, JIRA, Monday

Professional Experience

Powur, PBC — Remote

Quality Assurance Engineer | Mar 2024 – May 2025

- Architected and executed comprehensive manual and automated test strategies based on evolving business and technical requirements
- Engineered Postman test suites to validate complex API workflows and endpoints, ensuring robust integration between services
- Authored detailed test plans in TestRail to support regression, smoke, and integration testing across multiple modules
- Conducted RBAC testing across diverse user personas to ensure accurate permission controls
- Collaborated closely with cross-functional teams during Agile sprints, resolving blockers and improving test coverage
- Spearheaded responsive and mobile testing (Chrome, Safari, iOS, Android), identifying device-specific issues and UI inconsistencies
- Verified mobile solar design workflows across 3+ device types, ensuring alignment with business rules and reducing UI defects in production
- Queried relational databases to verify solar proposal calculations, incentive eligibility, and user role mappings across integrated services
- Identified and documented over 50 critical issues pre-release, directly contributing to enhanced user satisfaction and reduced support tickets

EyeCue Lab — Remote

Quality Assurance Engineer | Jun 2022 – Feb 2024

- Automated over 80% of core regression cases using Cypress, reducing release verification time from 5 hours to under 2 hours
- Built and maintained Postman test collections with environment-based chaining and data-driven assertions for API workflows and endpoints
- Conducted WCAG 2.1 Level AA accessibility audits, helping design teams implement inclusive front-end components
- Wrote SQL queries to validate backend data consistency, ensuring accurate data flow across APIs and UI components
- Monitored application performance via DataDog, proactively detecting and reporting outages and backend latency spikes
- Reviewed over 100 pull requests across services and contributed feedback to resolve logic bugs and UI inconsistencies
- Documented reproducible bugs in JIRA with clear steps and logs, reducing triage time by 30%
- Facilitated QA retrospectives, implementing feedback loops that improved test prioritization and sprint velocity

I–ology — Remote

Full-Stack Development Intern | Mar 2022 – May 2022

- Developed full-stack features for web applications in the healthcare industry, including patient scheduling, insurance, and user profile workflows
- Integrated APIs for third-party data sync and structured backend endpoints to support secure communication
- Designed mobile-responsive UI components and performed device-level validation to ensure accessibility and usability

Project Experience

Projects developed during software engineering training prior to focusing on QA.

Tarot Card Reader | Node.js, React

- Developed a responsive SPA simulating tarot readings with dynamic card rendering and interpretation logic
- Live demo: <https://cicy886.github.io/tarot-card-reader>

Local Business API | C#, .NET Core, MySQL

- Delivered a scalable RESTful API supporting location-based business discovery by category and service cost
- Structured endpoints with layered validation, robust filtering, and fallback mechanisms
- Source code: <https://github.com/cicy886/LocalBusinessApi.Solution>

Education

Epicodus — Remote | 2021 - 2022

Full-Stack Software Engineering Program

- Completed 10-month intensive training with 60+ projects using C#, .NET Core, JavaScript, React, and CSS
- Collaborated in Agile teams, executed code reviews, and delivered features under time-boxed sprints

Portland State University — Portland, OR | 2011 - 2015

Communication/General
